

Sébastien VELUT

Third year PhD student

I am a third year PhD student finishing my thesis on a Neuroscience-Artificial intelligence subject. I used deep learning classifiers combined with transfer learning and specific pre-processing methods in order to counter the cross-subject variability. I used innovative methods in order to understand better the mechanism behind the variability. I am searching for a job in the industry to work with deep learning methods applied to real world applications.

CONTACT

📍 | 137 rue des Meuniers, 92220, Bagneux, France

SKILLS

- Machine learning : Pytorch / Tensorflow
- Coding: Python / C / GitHub
- Pressure management
- Adaptability
- Team work
- Perseverance
- Autonomy

LANGUAGE

French		C2
English		C1
German		A2

INTÉRÊTS

🎮 Video games

🍴 Cooking

🧶 Crochet

PROFESSIONAL EXPERIENCE

PhD Student

ISAE SUPAERO & LISN-INRIA | Paris, France | Nov. 2023 - Today

- Address cross-subject variability with deep learning and specific pre-processing on EEG (time-series).
- Understand the variability by researching predictors and using novel methods
- Team project and project collaboration with GitHub
- Conference: ESANN, Graz BCI, IJCNN, NeuroErgonomics

Data manager

Pasteur Institute | Paris, France | Oct. 2022 - Aug. 2023

- Create and manage a database for a project on autism between clinical centers across Europe.
- Accompany clinicians and researchers across Europe about the proper use when entering data and maintaining database

Last year Internship: Emotions recognition by IR camera

TNO | Soesterberg, Netherlands | April 2022 - Sep. 2022

- Developing algorithm to detect emotions via multimodal sensors and AI algorithm
- Team working with people from different fields and article redaction

FORMATIONS

ISAE SUPAERO

Engineer School
Toulouse, France
2018-2022

General and specialization in Astrophysics, Neuroscience and Artificial intelligence
